Summary

Motivated and detail-oriented Computer Science student passionate about software development and continuously expanding technical skills through practical projects and learning. Also looking for opportunities to apply core programming knowledge in real-world applications and grow within a collaborative tech environment.

Experience

Java Programming Practice | Self-Learning / Academic Projects | 2024 – Present

- Built a strong foundation in core Java, including OOP, exception handling, collections, and multithreading
- Developed console-based applications using Java I/O and file handling to apply object-oriented principles
- Practiced clean coding and debugging through hands-on

Team Project – Task Tracker App | University Coursework | 2023

- Collaborated with a small team to design and implement a basic task tracker using Java
- Implemented features for adding, editing, and saving

Projects

I have worked on IoT based project named **Digital Sathi**- AI based voice module for home automation.

Web-Based College Management System: Using database(MySQL) to handle data storage and retrieval

Academics

Waling Multiple Campus, TU

Bachelors of Information Communication Technology Education. 2022-Present
